

# Healthy Older Adults Needed for Landmark Psychedelic Study

We are studying how psilocybin affects the health, mood, and wellbeing of healthy older adults.

## YOU MAY QUALIFY IF YOU:

- ✓ Are 65 to 85 years old
- ✓ Are generally healthy
- ✓ Have not used psilocybin in the past 12 months **or** 25 uses in a lifetime
- ✓ Have a support person to take you home after each medication visit

## WHAT TO EXPECT:

-  One in-person screening visit to see if the study is a good match
-  Two in-person clinic visits where you will be given psilocybin
-  Health checks, brain tests, and short surveys
-  Receive up to **\$400** for your participation
